Why Grandstream's GXV3610 series IP Camera

WEATHERPROOF-CERTIFIED CASING

Monitor and record outdoors without worrying about weather conditions

The GXV3610 series is built with an IP-66 certified weatherproof casing which allows it to stand up to almost any weather conditions in nearly any outdoor setting. Deploy the GXV3610 series on the exterior of a business, the entrance to a business or warehouse, parking lot, courtyard, or outside of your home to monitor and record in challenging weather conditions and in any light situation.

STATE-OF-THE-ART INFRARED SENSORS

Monitor low-light or no-light settings without missing a beat

Thanks to its' built-in Infrared sensors, the GXV3610 series can seamlessly transition from monitoring in well-lit coniditons to lowlight/no-light coniditions without missing a beat. Need to monitor a parking lot, outdoor entrance, warehouse, bank, retail location, or residential area where lighting is poor or turns off at night? The GXP3610 series eliminates lighting concerns and allows you to monitor and record in dark areas

COMPREHENSIVE MONITROING & RECORDING FEATURES

Always know what is going on at your business or home

Like all of Grandstream's IP cameras, the GXV3610 series offers a full suite of recording, monitoring, motion detection, and alert/notification features. All of these features can be setup in minutes using the cameras' web browser user interface. The SIP/VoIP support built-in to all Grandstream IP cameras allow for advanced notifications (email of camera screen shot or triggering a SIP call to a paired device) as well as video streaming to computers, mobile phones and IP video phones.

3.6MM LENS FOR WIDE-ANGLE, CLOSE PROXIMITY USE

View areas in close proximity to the camera with excellent image/video clarity

The GXV3610 series' 3.6mm lens is ideal for monitroing areas in close proximity to the camera at approximately an 80 degree angle. This makes the camera series the ideal IP camera to use at the entrance to your business, warehouse, or home - or any indoor/outdoor area that needs to be monitored in close proximity to the camera.

INTEGRATE WITH UCM6100 SERIES & MAJOR SIP PLATFORMS

Combine your IP PBX and Video Surveillance networks for added functionality

Register the GXV3610, and all Grandstream IP cameras, to your UCM6100 series or 3rd party IP PBX to merge telephony and IP video surveillance on to one common network that can be easily managed. Being a SIP device, the GXV3610 is fully compatible with all major SIP platforms to eliminate compatibility issues. Registering the GXV3610 series to your IP PBX allows you to make video calls to/from your cameras to view the live feed, set the camera to make a voice/video call to you when an alarm is triggered, set cameras to send you a text message or email when an alarm is triggered, and setup a complete facility access solution.

MONITOR/RECORD WITH FREE GSURF PRO

Create a complete surveillance solution at a fraction of what others will charge

Grandstream's GSurf Pro is the central management system for Grandstream cameras and encoder/decoders. It provides one-stop control for devices, video recording and alarm events. Use GSurf Pro to monitor, search and record up to 36 cameras simultaneously, manage videos locally or remotely via the controlled server with Client/Server architecture.
