

Aastra Phone 142

Handset for DECToverIP® -SIP-solution

DECT handset

Aastra Phone 142 is the perfect DECT phone for Aastra's DECToverIP® solution, which allows the complete integration of SIP and DECT communication.

This feature rich handset is a powerful tool for business communications on the go. It has a variety of convenient features such as hands-free operation, vibrating alert, back-lit graphic display and caller lists. Call filter, alarm function and the display of time and date complete the features.

A transferable memory card stores 100 phonebook entries and specific data of the handset.

Hands free operation and the option to connect a headset allows easy operation.
